

Texas Mutual Insurance Company Deploys Guidewire Core and Data Products

September 7, 2017

Texas-based workers' compensation insurer improves business agility and enhances customer and user experience

AUSTIN, Texas & FOSTER CITY, Calif.--(BUSINESS WIRE)--Sep. 7, 2017--

Texas Mutual Insurance Company (Texas Mutual), Texas' leading provider of workers' compensation insurance, and Guidewire Software (NYSE:GWRE), a provider of software products to the Property and Casualty (P&C) insurance industry, announced today that Texas Mutual has successfully deployed Guidewire PolicyCenter®, Client Data Management, Standards Based Templates, BillingCenter, and DataHub as its underwriting, policy administration, client data, product content, billing and enterprise data management solutions. The company is also in the process of implementing Guidewire InfoCenter™ as its new business intelligence solution.

Texas Mutual deployed Guidewire Core and Data products to modernize its aging, internally-built systems and transform the way it does business. Together, PolicyCenter, BillingCenter, and DataHub provide its users with a more advanced product suite and user-friendly experience. Implementing DataHub with PolicyCenter and BillingCenter at the same time helped Texas Mutual view the data challenge holistically and reduce risk to the project, while improving business insight and providing long-term sustainability. Texas Mutual, now a fully-deployed Guidewire InsuranceSuite™ customer, has been in production with Guidewire ClaimCenter® since 2014.

"We handle 40% of the workers' compensation insurance market in Texas, so implementing the Guidewire platform represents a significant milestone in our company's long-term system transformation," said Terry Buchheit, vice president, Core Digital Solutions, Information Technology Division, Texas Mutual. "This new streamlined foundation will provide us additional tools and flexibility to quickly meet our customer needs and enable future growth for Texas Mutual for years to come."

Buchheit continued, "Feedback from across the business has been positive so far, especially regarding the systems' intuitiveness. We also used this opportunity to update the entire Texas Mutual website, making it more user-friendly for our customers."

Guidewire Core and Data products are enabling Texas Mutual to:

- Enhance operational efficiency, employee productivity, and collaboration throughout the organization to transform its business by standardizing on a modern software technology platform;
- Simplify the underwriting process by automating manual processes;
- Better map and convert data through the full InsuranceSuite product line; and
- Increase responsiveness to changing business and technical requirements by bringing new products and product enhancements to market more quickly.

"We applaud Texas Mutual on their successful deployment of Guidewire Core and Data products," said Mike Polelle, chief delivery officer, Guidewire Software. "They are well positioned for success in their journey to adapt and succeed in today's rapidly-changing insurance marketplace."

About Texas Mutual Insurance Company

Austin-based Texas Mutual Insurance Company is the state's leading provider of workers' compensation insurance. We are now at 40% of the Texas market and over 68,000 Texas businesses rely on us to keep their employees safe and on the job. Since 1991, the company has provided a stable, competitively priced source of workers' comp insurance for Texas employers. Helping employers minimize the human and monetary consequences of workplace accidents is a key part of its mission. For more information, please visit www.texasmutual.com.

About Guidewire Software

Guidewire delivers the software that Property and Casualty (P&C) insurers need to adapt and succeed in a time of rapid industry change. We combine three elements – core operations, data and analytics, and digital engagement – into a technology platform that enhances insurers' ability to engage and empower their customers and employees. More than 300 P&C insurers around the world have selected Guidewire. For more information, please visit www.guidewire.com.
