Specializations are both regionally and globally based and require partners to demonstrate skills, knowledge, and competency in a specific Guidewire product or solution, as validated by Guidewire certification achievements. The attainment of specializations enables insurers to have more clarity and insight into which partners have proven capabilities in a specific region. In addition, partners with specializations can better promote their capabilities across Guidewire products and solutions. Over 100 Specializations have now been achieved by Guidewire PartnerConnect Consulting partners.

Guidewire offers several specialization options for Consulting partner staff to differentiate themselves. Guidewire Education offers certifications for business analysts, quality analyst and developers. Recently, they launched new Certified Associate and Certified Ace designations for analysts, which help partners achieve the Guidewire Cloud Specialization and customers identify cloud-ready talent.

Please find more information about specializations on the Guidewire website [here](#).

**The Global Delivery designation recognizes partners that have a large investment in the Guidewire practice, meet the skills requirements from a global perspective (not in region) and continue to meet the minimum number of references in region.*
