

## Make More Informed Risk Decisions with CogniSure AI's new Guidewire Marketplace App

January 26, 2022

WARRENVILLE, Ill. & SAN MATEO, Calif.--(BUSINESS WIRE)--Jan. 26, 2022-- Guidewire (NYSE: GWRE) and CogniSure AI (CogniSure) announced that CogniSure's new *Ready for Guidewire* validated [accelerator](#) for PolicyCenter is now available to users in the [Guidewire Marketplace](#).

"Data buried in unstructured insurance documents and applications is a huge hurdle for the digitization of commercial underwriting," said Sai Raman, founder and chief executive officer, CogniSure. "At CogniSure, our goal is to help insurers unlock the insights that are trapped in these documents by digitizing their processing. When processing these unstructured documents with CogniSure, insurers no longer have to be burdened with tedious manual entry and can focus more on analysis instead."

CogniSure's Submission Intake accelerator enables insurers to:

- Reduce manual data entry by accessing data extracted from submission documents such as ACORD, schedules, statement of values, and loss runs in PolicyCenter;
- Quickly view an embedded summary of its data analysis; and
- Update recommendations and add notes.

Built for the P&C insurance industry, CogniSure's deep learning algorithms extract, validate, and analyze data in unstructured submission documents to help insurers save time, reduce costs, and make better risk decisions. After processing, its app then digitally ingests the standardized, well-organized data and analysis into PolicyCenter, providing prior policy, loss views, and risk analysis.

"We applaud CogniSure on the release of its PolicyCenter accelerator," said Becky Mattick, vice president, Global Solution Alliances, Guidewire. "CogniSure's technology is now easily accessible through PolicyCenter, allowing our joint customers to receive actionable insights that would otherwise be buried in unstructured documents."

### About CogniSure AI

The CogniSure AI Platform unlocks insights trapped in unstructured documents such as loss runs, submissions, quotes and policies. Its deep learning algorithms accurately extract, validate and analyze data from these documents to create new growth opportunities, develop risk insights, reduce costs, and help customers prevent losses.
