Non-GAAP Financial Measures and Other Metrics

This press release contains the following non-GAAP financial measures: non-GAAP gross profit, non-GAAP income (loss) from operations, non-GAAP net income (loss), non-GAAP tax provision (benefit), non-GAAP net income (loss) per share, and free cash flow. Non-GAAP gross profit and non-GAAP income (loss) from operations exclude stock-based compensation, amortization of intangibles, the COVID-19 Canada Emergency Wage Subsidy benefit, and acquisition consideration holdback. Non-GAAP net income (loss), non-GAAP tax provision (benefit), and non-GAAP net income (loss) per share also exclude the amortization of debt discount and issuance costs from our convertible notes, changes in fair value of our strategic investments, and the related tax effects of the non-GAAP adjustments. Free cash flow consists of net cash flow provided by (used in) operating activities less cash used for purchases of property and equipment and capitalized software development costs. These non-GAAP measures enable us to analyze our financial performance without the effects of certain non-cash items such as amortization, stock-based compensation, and changes in fair value of strategic investments.

Annual recurring revenue ("ARR") is used to quantify the annualized recurring value outlined in active customer contracts at the end of a reporting period. ARR includes the annualized recurring value of term licenses, subscription agreements, support contracts, and hosting agreements based on customer contracts, which may not be the same as the timing and amount of revenue recognized. All components of the licensing and other arrangements that are not expected to recur (primarily perpetual licenses and professional services) are excluded. In some arrangements with multiple performance obligations, a portion of recurring license and support or subscription contract value is allocated to services revenue for revenue recognition purposes, but does not get allocated for purposes of calculating ARR. This allocation only impacts the initial term of the contract. This means that as we increase arrangements with multiple performance obligations that include services at discounted rates, more of the total contract value will be recognized as services revenue, but our reported ARR amount will not be impacted. During the fiscal quarter ended October 31, 2022, the recurring license and support or subscription contract value recognized as services revenue was \$10.9 million.

Guidewire believes that these non-GAAP financial measures and other metrics provide useful information to management and investors regarding certain financial and business trends relating to Guidewire's financial condition and results of operations. The Company's management uses these non-GAAP measures and other metrics to compare the Company's performance to that of prior periods for trend analysis, for purposes of determining executive and senior management incentive compensation, and for budgeting and planning purposes. The Company believes that the use of these non-GAAP financial measures and other metrics provides an additional tool for investors to use in evaluating ongoing operating results and trends and in comparing the Company's financial measures with other software companies, many of which present similar non-GAAP financial measures and other metrics to investors.

Management of the Company does not consider these non-GAAP measures in isolation or as an alternative to financial measures determined in accordance with GAAP. The principal limitation of these non-GAAP financial measures is that they exclude significant expenses and income that are required by GAAP to be recorded in the Company's financial statements. In addition, they are subject to inherent limitations as they reflect the exercise of judgment by management about which expenses and income are excluded or included in determining these non-GAAP financial measures. Guidewire urges investors to review the reconciliation of its non-GAAP financial measures to the comparable GAAP financial measures, which it includes in press releases announcing quarterly financial results, including the financial tables at the end of this press release, and not to rely on any single financial measure to evaluate the Company's business.
