

Accelerate Field Inspection Documentation with U Scope's New Photo Management Guidewire Marketplace App

November 1, 2023

SAN MATEO, Calif. & TAMPA, Fla.--(BUSINESS WIRE)--Nov. 1, 2023-- Guidewire (NYSE: GWRE) and U Scope Technologies (U Scope) announced that PHOTO iD's new *Ready for Guidewire* validated [accelerator](#) is now available to ClaimCenter users in the [Guidewire Marketplace](#).

PHOTO iD by U Scope provides insurers with a quick, organized way to capture and label property inspection images, then share detailed photo inspection reports, even before leaving the inspection site. PHOTO iD allows insurers to create custom inspection workflow templates to guide users through the inspection remotely or with the platform's automated inspection guidance feature. The cloud-based photo management and documentation platform can be accessed by both mobile and web, enabling real-time team collaboration and communication via video or team chat.

With the U Scope's PHOTO iD Accelerator for Realtime Property Documentation, insurers can:

- Easily access inspection status updates, fully captioned photos, and detailed inspection reports within ClaimCenter;
- Improve field documentation efficiency and policyholder satisfaction; and
- Decrease inspection costs and reporting errors.

PHOTO iD includes numerous features that facilitate an easy, detailed inspection, such as a roof pitch gauge, in-camera compass, pre-labeled inspection category folders, custom reports, real-time voice-labeled captions with a single touch, and much more.

"With natural disasters seemingly increasing in frequency and severity each year, it is clear that property inspections need to be quick, thorough, and accurate," said Earl Randolph, Founder, U Scope Technologies. "PHOTO iD was created to modernize and optimize inspections, ensuring efficiency and ease for insurers, inspectors, and policyholders alike."

"We congratulate U Scope on the release of its new ClaimCenter app," said Will Murphy, Vice President, Global Solution Alliances, Guidewire. "PHOTO iD can help insurers reduce claim cycle time and gain policyholders the resolution they desire faster than ever. Now, connected with Guidewire, the PHOTO iD app can help to increase insurer efficiency even further."

About U Scope Technologies

U Scope develops innovative software solutions and mobile applications tailored to provide a safer, faster, and more efficient process for documenting the condition or repair status of residential and commercial properties.

U Scope leverages the power of AI technology within their team collaborative photo management platform to usher a new era of streamlining the photo documentation and reporting lifecycle of any property inspection or field service task to boost team productivity and improve customer satisfaction.

U Scope's secure infrastructure is designed with robust safeguards to ensure the protection of both their clients' private information and data by maintaining SOC2 compliance to help protect against unauthorized access from both internal and external threats.
