

Harness Satellite-Powered Natural Catastrophe Data with ICEYE's New Guidewire Cloud Integration

June 20, 2024

SAN MATEO, Calif. & HELSINKI--(BUSINESS WIRE)--Jun. 20, 2024-- Guidewire (NYSE: GWRE) and ICEYE, a global leader in satellite-powered disaster management solutions, announced that ICEYE's new *Ready for Guidewire* validated [accelerator](#) is now available to ClaimCenter on Guidewire Cloud users in the [Guidewire Marketplace](#). ICEYE, a recent Insurtech Vanguard program graduate and the winner of Guidewire's inaugural Insurtech Vanguard Pitch Day, is now a Guidewire PartnerConnect Solution partner.

ICEYE's NatCat Insights solution, powered by its own synthetic aperture radar (SAR) satellite constellation and a mix of comprehensive third-party data, delivers persistent monitoring capabilities to detect and respond to climate-related changes quickly and accurately in any location on Earth. This rapid situational awareness of natural disasters enables insurers to optimize response plans, communicate proactively with policyholders, size losses effectively, identify priority regions, and allocate and deploy resources efficiently. ICEYE's accelerator integrates ICEYE NatCat Insights with ClaimCenter on Guidewire Cloud.

With the ICEYE Accelerator for NatCat Insights, insurers can:

- Integrate ICEYE's powerful data into the First Notice of Loss (FNOL) workflow and subsequent claims adjudication processes, empowering more informed decisions;
- Expedite FNOL intake by easily validating losses, improving the accuracy and efficiency of claims triage and routing; and
- Boost customer satisfaction with reduced claim cycle times, faster claims payments, and proactive communication with policyholders.

ICEYE owns and operates [the world's largest SAR satellite constellation](#), which collects images day and night in any weather conditions. This allows ICEYE to provide global coverage with up to sub-daily monitoring, enabling a fast, accurate response to changes taking place anywhere on the planet.

"ICEYE's unique NatCat insight data, delivered in near-real time into Guidewire's market-leading claim software, will transform the way insurers can respond and support their customers at a time of significant stress and challenge," said Rupert Bidwell, Vice President, Insurance Solutions, ICEYE.

"Congratulations to ICEYE on the release of its new ClaimCenter integration," said Will Murphy, Vice President, Global Technology Alliances, Guidewire. "ICEYE's technology supports insurers across a broad spectrum of catastrophe event response and claim processes including rapid situational awareness, customer resilience and communication, third-party supplier management, FNOL, triage, fraud, and claims payments."

About ICEYE

ICEYE delivers unparalleled persistent monitoring capabilities to detect and respond to changes in any location on Earth, faster and more accurately than ever before.

Owning the world's largest synthetic aperture radar (SAR) satellite constellation, ICEYE provides objective, near real-time insights, ensuring that customers have unmatched access to actionable data, day or night, even in challenging environmental conditions. As a trusted partner to governments and commercial industries, ICEYE delivers intelligence in sectors such as insurance, natural catastrophe response and recovery, security, maritime monitoring, and finance, enabling decision-making that contributes to community resilience and sustainable development.

ICEYE operates internationally with offices in Finland, Poland, Spain, the UK, and the US. It has more than 700 employees, inspired by the shared vision of improving life on Earth by becoming the global source of truth in Earth Observation.
