"Software as a service (SaaS) property and casualty (P&C) insurance core platforms enable insurers to support the administration of a range of P&C insurance products. SaaS adoption for P&C insurers seeking core platforms for modernization, consolidation or to meet new needs is almost ubiquitous in North America," Gartner wrote. "They are mission-critical systems for insurance companies, foundational for digital optimization and enablers for digital transformation."

"The future of how work gets done and the role of embedded AI in core insurance systems (including machine learning, GenAI and AI agent) brings a sharp focus on vendor roadmaps, support for regulations, delivery capabilities and even their future business model," Gartner continued.

"We are honored that Guidewire is again recognized as a Leader in the Magic Quadrant for SaaS P&C Core Platforms, and grateful to our customers and partners for their trust," said Brian Desmond, Chief Marketing Officer at Guidewire. "We believe this recognition affirms our vision for intelligent insurance, where cloud, data, and AI work together to help insurers move faster, serve customers better, and shape the future of the industry."
